

BIO CLEAR

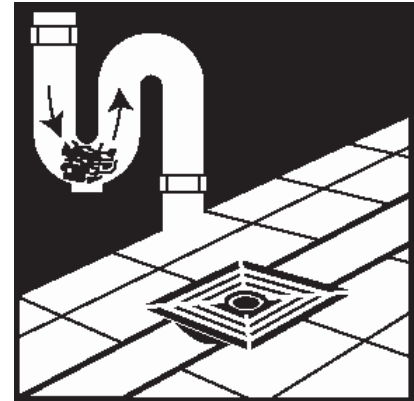

Biological Drain & Grease Trap Maintainer

BIO CLEAR

Bio Clear is a biological liquid designed to digest fat and grease to maintain drains and grease traps; preventing blockage. Regular use of Bio Clear will keep your drainage system free from major problems.

FEATURES & BENEFITS

- Biological liquid digests fat/grease
- Regular use ensures free flowing drains
- Grease traps work better and longer
- Reduced grease trap service
- Has odour control properties
- Safe for the user

HOW TO USE

Grease Trap: Bio Clear should be automatically dispensed into drain/grease trap through biological drain dosing system. Should be performed 2 hours after the end of the working day. Alternatively, pour Bio Clear manually into the drain at the end of the working day. Initial dose: 2 Litres, Daily maintenance: 300ml

Drain Lines: Pour manually into the drain at the end of the day as close as possible to the source of the grease. Initial dose: 500ml, Daily maintenance: 300ml

USEFUL INFORMATION

Product Characteristics

Amber Opaque Liquid

Availability

In 20 Litre boxes

Storage

in original container away from extremes of temperature

Composition

Contains a blend of naturally occurring micro-organisms, fragrance and thickener
